

NATURAL ASSETS

Indicators characterise availability of stocks of renewable and non-renewable resources necessary for economic activity and appear the most important factor quality of life of present and future generations

Land resources

20 760,9 thsd ha

Forest resources

9 690 thsd ha

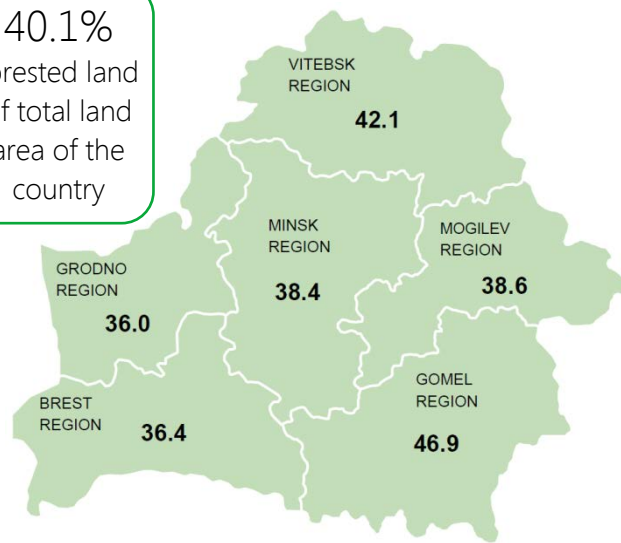

1 857.6 mln m³
stock of forest
vegetation

27 mln m³
marketable timber
harvested

40.1%
forested land
of total land
area of the
country

Freshwater resources

37 300 mln m³

3.6%

water resources
exploitation index

141

m³ per capita
water abstraction
from natural sources

Wildlife resources

83 species
of mammals

332 species
of birds

7 species
of reptiles

68 species
of fish

4 033 species
of vascular plants

* Freshwater resources and water resources exploitation index data is given for 2019.
