The statistical data book presents statistics describing the development of the system of education in the Republic of Belarus. The publication is intended for government officials, management and teaching staff of education institutions, postgraduate and undergraduate students, and other interested users.

The statistical data book has been prepared on the basis of the data of the Ministry of Education of the Republic of Belarus and the State Committee on Science and Technology of the Republic of Belarus.

In some cases data for 2025 are preliminary and may be revised in further issues.

Relative indicators have been calculated on the basis of absolute figures expressed in smaller units of measure than those provided in the tables. In certain cases minor discrepancies between the total and the sum can be assigned to data rounding.

The statistical data book is published every two years, illustrated with charts and diagrams.

A short glossary of statistical terms is available on the official website of Belstat (belstat.gov.by) in the Methodology section (in Russian only).
