FOREWORD

This annual edition is the second volume of the publication "Regions of the Republic of Belarus" and contains statistical information on the socio-economic development of the regions and Minsk city, cities of regional subordination and districts of the Republic of Belarus for 2015, 2019-2024.

The data book presents a general description of the socio-economic development of the regions of Belarus. For each city of regional subordination and district, statistical information is provided on the population, employment and registered unemployment rate, earnings, industrial and agricultural production, housing construction and commissioning of social and cultural facilities, retail and catering turnover, paid services to population, exports of goods and services, main financial indicators of organisations, fixed capital investment and foreign investment.

The publication will help broaden the understanding of the socio-economic development of the regions, cities, districts of the Republic of Belarus and will provide an opportunity to conduct a comparative analysis among them.

The volumes of the production of gross regional product, of industrial production, agricultural production, fixed capital investment, retail catering turnover and paid services to population are provided in current prices, while indices are in comparable prices. The volumes of foreign trade in goods and services are provided in current prices.

For the years 2015, 2020-2023 the data on earnings, volume of industrial production by cities of regional subordination and districts, as well as the data on financial results are given without micro entities that were not included in the sample statistical survey of financial and economic activities of micro entities.

Information by economic activity is provided in accordance with the National Classification of the Republic of Belarus OKRB 005-2011 "Kinds of economic activity".

Data on selected indicators for 2023 have been revised as compared with those published earlier. In some cases, the 2024 data are preliminary and may be revised in further issues.

Value indicators from 2019 are provided in terms of the new denomination effective from 1 July 2016 (1 BYN = 10 000 BYR).

Relative indicators have been calculated on the basis of absolute figures expressed in smaller units of measure than those provided in tables. In some cases, a minor discrepancy between the total and the sum can be explained by data rounding.

Methodological notes on calculation of selected indicators are provided in the relevant sections of the first volume of the publication "Regions of the Republic of Belarus".

The data book has been prepared using the data of the Ministry of Health of the Republic of Belarus, the Ministry of Culture of the Republic of Belarus, the Ministry of Education of the Republic of Belarus, the Ministry of Natural Resources and Environmental Protection of the Republic of Belarus, the Ministry of Labour and Social Protection of the Republic of Belarus, and the State Committee for Property of the Republic of Belarus.
