# AGRICULTURE OF THE REPUBLIC OF BELARUS

statistical book

MINSK  
2021

## EDITORIAL BOARD:

I.V. Medvedeva – Chair

E.I. Kukharevich, Z.N. Vasilevskaya, O.A. Dovnar, N.V. Tarasiuk,  
T.V. Lapkovskaya, I.A. Mazaiskaya, E.M. Palkovskaya, E.A. Zdrok

The book presents data on the agricultural development of the country in 2014 – 2020. Selected indicators refer to a lengthier period.

Intended for higher managerial personnel, government bodies, financial and economic departments of organisations, research community, teaching staff, postgraduates and students of higher education institutions and other interested users.

## FOREWORD

The statistical book contains main indicators characterizing the agricultural sector of the Republic of Belarus for 2014 – 2020. Selected data are provided for a lengthier period.

The statistical book is prepared on the basis of data of exhaustive and sample state statistical surveys as well as administrative data State Committee on Property of the Republic of Belarus and Ministry of Agriculture and Food of the Republic of Belarus, National Academy of Sciences of the Republic of Belarus.

The statistical book contains data on the main indicators of agricultural development: agricultural production, production structure of main agricultural products, per capita agricultural production.

The substantial place is given to crop growing and animal husbandry indicators. This publication includes data on agricultural area and its structure by types of farms; area under crops, gross harvest, yield capacity of agricultural crops and perennial plantations. The data on livestock and poultry population, production of main animal products are also included.

Separate section of the publication contains information on agricultural facilities: data on fixed capital investment, production and availability of agricultural machinery.

There are also data on production of basic products of food industry, foreign trade in food goods, consumption of basic food products.

The book also includes data characterizing financial standing of organisations, average prices of agricultural products sold.

The data are presented at the national and regional levels with selected indicators broken down by district.

The data book provides selected indicators of the National List of the Sustainable Development Goal indicators.

Starting from 2016 the information by economic activity is provided in accordance with the national classification of the Republic of Belarus ОКРБ 005-2011 “Kinds of economic activity”. To ensure comparability, data by economic activity for 2014 – 2015 have been converted accordingly based on the new version of the classification.

Data in value terms are provided in current prices, before 2016 in BYR, from 2016 in BYN (1 BYN = 10 000 BYR).

Population data have been adjusted to reflect the results of the 2019 census. The average annual population, adjusted for the 2019 census, was used to calculate the relative indicators.

In several cases the 2020 data are preliminary and are subject to revision in further issues.

### Abbreviations:

thous.	- thousand	hp	- horse power	m <sup>2</sup>	- square metre
bn	- billion	kg	- kilogramme	dal	- decalitre
mln	- million	ha	- hectare		

### Explanation of symbols:

- not applicable
- 0.0 negligible magnitude
- ... data not available

In several cases insignificant discrepancies between the total and the sum of its components is explained by data rounding.

Relative ratios are calculated on the basis of absolute numbers with smaller units of measure than those presented in the tables.

## CONTENTS

	Pg.
<b>1. Main socio-economic indicators</b>	
1.1. Main socio-economic indicators for years 2014 – 2020 . . . . .	10
1.2. Selected indicators of the National List of SDG 2 indicators. End hunger, achieve food security and improved nutrition and promote sustainable agriculture. . . . .	13
<b>2. Characteristics of economic entities</b>	
2.1. Agricultural organisations and private farms by region . . . . .	14
2.2. Agricultural organisations by legal organisational form. . . . .	15
2.3. Agricultural organisations by ownership . . . . .	16
<b>3. Employment</b>	
3.1. Number of employees in agriculture by educational attainment and age groups. . . . .	17
3.2. Payroll number of employees in organisations by region . . . . .	18
3.3. Nominal gross average monthly earnings of employees by region . . . . .	19
3.4. Real earnings of employees by region . . . . .	20
3.5. Graduates from secondary specialised and higher education programmes with specialty in “Agriculture”. . . . .	21
3.6. Occupational injuries in agricultural organisations. . . . .	21
<b>4. Main indicators of agriculture</b>	
4.1. Agricultural output by type of farm. . . . .	23
4.2. Structure of agricultural output by type of farm. . . . .	24
4.3. Structure of agricultural output by type of output and type of farm. . . . .	24
4.4. Indices of agricultural output . . . . .	25
4.5. Indices of crop output. . . . .	25
4.6. Indices of animal output. . . . .	26
4.7. Structure of agricultural output by type in farms of all types . . . . .	26
4.8. Structure of production of basic agricultural products by type of farm . . . . .	27
4.9. Indices of agricultural output in farms of all types by region . . . . .	28
4.10. Agricultural production per capita. . . . .	28
4.11. Main indicators of agricultural organisations activity. . . . .	29
4.12. Main indicators of private (peasant) farms activity. . . . .	30
4.13. Main indicators of household activities. . . . .	31
<b>5. Physical resources of agriculture</b>	
5.1. Manufacture of basic agricultural machinery . . . . .	32
5.2. Number of basic agricultural machinery and equipment in agricultural organisations	33
5.3. Number of basic agricultural machinery and equipment in agricultural organisations by region . . . . .	34

	Pg.
5.4. Availability of tractors and combine harvesters in agricultural organisations . . . . .	36
5.5. Production of mineral fertilizers. . . . .	36
5.6. Application of mineral fertilizers in agricultural organisations . . . . .	37
5.7. Application of mineral fertilizers in agricultural organisations by region . . . . .	38
5.8. Application of organic fertilizers in agricultural organisations . . . . .	39
5.9. Application of mineral and organic fertilizers per hectare of ploughland in agricultural organisations (graph) . . . . .	39
5.10. Application of organic fertilizers in agricultural organisations by region. . . . .	40
5.11. Liming of soils in agricultural organisations . . . . .	40
5.12. Power capacity in agricultural organisations. . . . .	41
5.13. Commissioning of production facilities . . . . .	41
<b>6. Crop growing</b>	
6.1. Agricultural land by land user . . . . .	42
6.2. Structure of agricultural land by land user . . . . .	43
6.3. Reclaimed land . . . . .	44
6.4. Sown area under basic agricultural crops in farms of all types . . . . .	45
6.5. Sown area under agricultural crops by crop and type of farm. . . . .	46
6.6. Area of fruit and berries plantations by type of farm . . . . .	48
6.7. Structure of sown area under agricultural crops by crop and type of farm . . . . .	49
6.8. Sown area under agricultural crops on reclaimed land in agricultural organisations. .	52
6.9. Total sown area under agricultural crops by type of farm by region . . . . .	53
6.10. Sown area under grains and legumes by type of farm by region . . . . .	54
6.11. Sown area under rape by type of farm by region . . . . .	55
6.12. Sown area under sugar beets by type of farm by region. . . . .	55
6.13. Sown area under flax by type of farm by region. . . . .	56
6.14. Sown area under potatoes by type of farm by region. . . . .	57
6.15. Sown area under vegetables by type of farm by region. . . . .	58
6.16. Sown area under forage crops by type of farm by region. . . . .	59
6.17. Sown area under basic agricultural crops in agricultural organisations by district. .	60
6.18. Gross harvest of basic agricultural crops . . . . .	72
6.19. Yield capacity of basic agricultural crops . . . . .	73
6.20. Gross harvest of agricultural crops by crop and type of farm . . . . .	74
6.21. Yield capacity of agricultural crops by type of farm . . . . .	76
6.22. Gross harvest of fruits and berries by type of farm . . . . .	79
6.23. Yield capacity of fruits and berries by type of farm . . . . .	80
6.24. Gross harvest and yield capacity of grains and legumes in agricultural organisations (graph) . . . . .	81
6.25. Gross harvest and yield capacity of potatoes in agricultural organisations (graph) .	81

	Pg.
6.26. Gross harvest and yield capacity of flax fibre in agricultural organisations (graph) . . . . .	82
6.27. Gross harvest and yield capacity of sugar beets in agricultural organisations (graph) . . . . .	82
6.28. Gross harvest and yield capacity of vegetables in agricultural organisations (graph) . . . . .	83
6.29. Gross harvest and yield capacity of rape in agricultural organisations (graph). . . . .	83
6.30. Gross harvest and yield capacity of agricultural crops on reclaimed land in agricultural organisations . . . . .	84
6.31. Gross harvest of grains and legumes by type of farm by region . . . . .	85
6.32. Gross harvest of rape by type of farm by region . . . . .	86
6.33. Gross harvest of sugar beets by type of farm by region . . . . .	86
6.34. Gross harvest of flax fibre by type of farm by region . . . . .	87
6.35. Gross harvest of potatoes by type of farm by region . . . . .	88
6.36. Gross harvest of vegetables by type of farm by region . . . . .	89
6.37. Gross harvest of fruits and berries by type of farm by region . . . . .	90
6.38. Yield capacity of grains and legumes by type of farm by region . . . . .	91
6.39. Yield capacity of rape by type of farm by region . . . . .	92
6.40. Yield capacity of sugar beets by type of farm by region . . . . .	92
6.41. Yield capacity of flax fibre by type of farm by region . . . . .	93
6.42. Yield capacity of potatoes by type of farm by region . . . . .	94
6.43. Yield capacity of vegetables by type of farm by region . . . . .	95
6.44. Yield capacity of fruits and berries by type of farm by region . . . . .	96
6.45. Gross harvest and yield capacity of basic agricultural crops in agricultural organisations by district . . . . .	97

## **7. Animal husbandry**

7.1. Livestock population in farms of all types . . . . .	114
7.2. Basic livestock population by type of farm . . . . .	116
7.3. Structure of livestock population by type of farm . . . . .	117
7.4. Number of basic livestock and poultry by type of farm by region . . . . .	118
7.5. Number of basic livestock and poultry in agricultural organisations by district . . . . .	124
7.6. Production of basic animal products in farms of all types . . . . .	134
7.7. Production of basic animal products by type of farm . . . . .	135
7.8. Structure of production of basic animal products by type of farm . . . . .	136
7.9. Sales of livestock and poultry for slaughter by livestock type and type of farm . . . . .	137
7.10. Structure of sales of livestock and poultry by livestock type and type of farm . . . . .	138
7.11. Sales of livestock and poultry for slaughter by type of farm by region . . . . .	139
7.12. Production of milk by type of farm by region . . . . .	141
7.13. Average milk yield per cow by type of farm by region . . . . .	142
7.14. Production of eggs by type of farm by region . . . . .	143
7.15. Production of wool (physical weight) by type of farm by region . . . . .	144

	Pg.
7.16. Sales of livestock and poultry for slaughter in agricultural organisations by district . . . . .	145
7.17. Production of milk and average milk yield per cow in agricultural organisations by district . . . . .	149
<b>8. Financial standing and prices</b>	
8.1. Main financial indicators of organisations in agriculture . . . . .	155
8.2. Status of accounts of organisations in agriculture. . . . .	156
8.3. Main financial indicators of agricultural organisations by region . . . . .	158
8.4. Status of accounts of agricultural organisations by region . . . . .	161
8.5. Profitability of products sold by agricultural organisations . . . . .	163
8.6. Average agricultural producer prices . . . . .	164
8.7. Agricultural producer price indices . . . . .	164
8.8. Price parity index of industrial and agricultural products . . . . .	164
<b>9. Processing of agricultural products</b>	
9.1. Main indicators of organisations with economic activity in “Manufacture of food, beverages and tobacco products” . . . . .	166
9.2. Structure of manufacture of food, beverages and tobacco products . . . . .	167
9.3. Commissioning of production capacities . . . . .	167
9.4. Manufacture of basic food products and beverages . . . . .	168
<b>10. External trade in goods</b>	
10.1. Volume of foreign trade in agricultural and food products . . . . .	169
10.2. Exports of selected agricultural products and foodstuffs. . . . .	170
10.3. Imports of selected agricultural products and foodstuffs . . . . .	172
10.4. Imports of selected commodities in the Republic of Belarus . . . . .	172
<b>11. Food balance sheets</b>	
11.1. Level of self-sufficiency in basic agricultural products. . . . .	173
11.2. Supply and use of meat and meat products . . . . .	174
11.3. Supply and use of milk and dairy products . . . . .	174
11.4. Supply and use of eggs and egg products . . . . .	175
11.5. Supply and use of fish and fish products . . . . .	175
11.6. Supply and use of potatoes and potato products. . . . .	176
11.7. Supply and use of vegetables and cucurbits and their conversion products . . . . .	176
11.8. Supply and use of fruits and berries and their conversion products . . . . .	177
11.9. Consumption of basic food products per capita . . . . .	177

## 1. MAIN SOCIO-ECONOMIC INDICATORS

Current population estimates as of January 1 are based on the results of the last population census. The estimates take into account increase or decrease of population in selected areas due to the changes of their boundaries, as well as changes in urban and rural population caused by changes in administrative and territorial system of the Republic of Belarus i.e. changes of a settlement status (rural-to-urban or urban-to-rural transformation under legislative acts).

Resident population refers to individuals who permanently reside in a given area as well as foreign nationals and stateless persons who temporarily reside in a given area for a year or more.

The population is classified into urban and rural according to the place of residence. In this respect, urban settlements refer to localities that were granted an urban status in compliance with the legislation (cities, urban, industrial and resort settlements). All other settlements are rural.

Payroll number of employees includes employees who worked under employment agreements (contracts) and performed permanent, temporary or seasonal work for a day or more. This includes actually showed up for work, including employees who did not work due to deadtime, and those temporarily absent from work for any reason (who are on labor leave, leave granted by the employer, who did not show up for work, whose absences are documented by sick notes or certificates of temporary disability, and for other reasons). External multiple job holders and civil-law contractors are not included.

Average annual payroll number of employees is a sum of payroll number of employees on average per month for all months of the year divided by 12. Average annual payroll number of employees does not include employees on maternity leave and on child care leave up to the age of three years.

Data on the number of employees by level of education and age groups include employees on maternity leave and child care leave until the child reaches the age of three.

Nominal gross average monthly earnings are calculated by dividing the gross payroll, including income tax and compulsory insurance contributions of employees, by the average payroll number of employees used for the calculation of the average earnings and by the number of months in the period.

Real earnings is a relative statistical measure characterizing the purchasing power of earnings in the reference period in connection with the changes in prices of consumer goods and services compared with the base period. It is calculated by dividing the nominal gross earnings index by the consumer price index for the same time period.

Gross Domestic Product (GDP) reflects the value of goods and services produced in the country by all types of economic activities and intended for final consumption, capital formation and net exports. GDP by production approach is calculated as the sum of gross values added by economic activities and net taxes on products.

Gross value added reflects the difference between output of goods and (or) services and intermediate consumption calculated by economic activities.

The Sustainable Development Goals (SDGs) are 17 goals fixed in the 2030 Agenda for Sustainable Development adopted by the United Nations member states at the United Nations Summit in September 2015. These goals refer to various areas of the socio-economic development and have to be achieved by 2030. To monitor the progress in achieving each goal, a list of relevant indicators was developed.

The data book presents selected indicators of SDG 2 End hunger, achieve food security and improved nutrition and promote sustainable agriculture:

2.3.1. Volume of production per production unit by size class of farm enterprises is calculated as a ratio of revenue from sales of agricultural products produced by small producers to the number of farms and the number of calendar days in a year and is recalculated at the purchasing power parity of the Belarusian ruble to the US dollar;

2.3.2.1. Average income of small producers of food products is defined as profit from sales of products, goods, works, services per one small food producer and is recalculated at the purchasing power parity of the Belarusian ruble to the US dollar;

2.5.1. Number of plant and animal genetic resources for food and agriculture secured in either medium- or long-term conservation facilities;

2.a.1. The agriculture orientation index for government expenditures is calculated as a ratio of the proportion of agriculture in government spending to the proportion of agriculture in GDP, where agriculture covers agriculture, forestry and fishing sector;

Fixed capital investment reflects the total costs invested in the acquisition, reproduction and creation of new fixed assets.

Labour productivity in agriculture per employee is measured as a ratio of the output produced in agricultural organisations at current prices to the average payroll number of employees engaged in agricultural production. The index of labour productivity is calculated as a ratio of the index of agricultural output at constant prices to the index of changes in the average payroll number of employees engaged in agricultural production.

## 1. MAIN SOCIO-ECONOMIC INDICATORS

### 1.1. Main socio-economic indicators for 2014 – 2020

	2014	2015	2016	2017	2018	2019	2020
Population (end of year), persons <sup>1)</sup>	9 453 058	9 469 093	9 469 665	9 448 312	9 429 257	9 410 259	9 349 645

<sup>1)</sup> Data do not include micro-entities; for 2014 – 2015 according to national classification of the Republic of Belarus OKRB 005-2006 "Types of economic activities", for 2016 – 2020 according to OKRB 005-2011.

## 4. MAIN INDICATORS OF AGRICULTURE

Agricultural output is the total value of material goods produced in the sector both for sale and for internal consumption. Agricultural output includes the value of animal husbandry and crop-growing products, and change in the value of work-in-progress in crop growing.

Crop growing output is the value of raw products obtained from the harvest of the reference year (cereals and legumes, oil seeds, potatoes, sugar beets, flax fibre, forage crops, vegetables, fruits and berries, planting stock (nursery plants), flower products, mushrooms, etc.), value of planting young perennial plantations, changes in the value of work-in-progress in crop growing (costs associated with work done in the reference year for the harvest of the next year (sowing of winter crops, fall-ploughing, etc.).

Animal husbandry output is the value of raw products obtained as a result of raising and economic use of farm animals and poultry (milk, eggs, honey, wool, etc.), expenses related to raising of farm animals and poultry (crop, growth and weight gain), the value of young stock sold for breeding.

Index of agricultural output is a relative statistical measure reflecting changes in agricultural output in the periods compared (in constant prices).

Farms of all types means all groups of agricultural producers. They include:

agricultural organisations defined as legal entities (excluding private farms), their subdivisions with separate balance and main and/ or secondary economic activity in agriculture, excluding provision of services in crop growing and animal husbandry (according to National Classification of Economic Activities of the Republic of Belarus (OKRB 005-2011), groups 011 – 015);

private farms;

household subsidiary plots which are personal subsidiary plots of permanent rural residents, subsidiary plots of individuals, engaged in agricultural production using land plots allotted for construction and/ or maintenance of single-family, terraced residential houses, collective gardening or dacha (summer house) construction.

## 4.1. Agricultural output by type of farm

(at current prices; million rubles; 2014 – 2015 – billion rubles;)

	2014	2015	2016	2017	2018	2019	2020
Farms of all types

## 5. PHYSICAL RESOURCES OF AGRICULTURE

Availability of specific agricultural machinery in agricultural organisations is a ratio of the number of related machinery as of the end of the year to the sown area (ploughland) under corresponding agricultural crops. Calculated per 1000 hectares of sown area (plough land).

Load rate on agricultural machinery is a ratio of plough land or sown area of agricultural crops to the number of agricultural machinery. Calculated per unit of corresponding type of agricultural machinery.

Power capacity in agricultural organisations is the total capacity of all energy sources supporting production process – mechanical and electric motors, electricity generating plants, and animal draught power.

Power supplied per worker in agricultural organisations is a ratio of total power capacities to the average annual number of workers engaged in agricultural production.

Power supply in agricultural organisations is the ratio of total power capacities to sown area of agricultural crops. Calculated per 100 hectares of sown area.

### 5.1. Manufacture of basic agricultural machinery

(units)

## 6. CROP GROWING

Agricultural land is land regularly used for obtaining agricultural products. It includes arable land, fallow land, land under permanent crops, and meadow land.

Arable land is agricultural land regularly cultivated (plowed) and used under agricultural crops, including perennial grass with period of use specified by the scheme of crop rotation as well as emergency fields, soil area under cover (greenhouses), and clean fallow.

Land under permanent crops is land covered with artificial trees and shrubs (plantations) or plantations of herbaceous perennial plants, intended for fruit harvest, food, technical and medicinal plants, as well as for landscaping.

The data on the availability and distribution of land are provided by the State Committee on Property of the Republic of Belarus.

Sown area is a part of arable land under agricultural crops.

Gross harvest of agricultural crops is the output produced (harvested) from the total sown area under agricultural crops. Gross harvest of grains and legumes is measured in weight after treatment.

Yield capacity of agricultural crops is the average harvest of agricultural products per unit of actually harvested area (per hectare).

## 7. ANIMAL HUSBANDRY

Livestock and poultry population is the number of farm animals – cattle, pigs, sheep, goats, horses and others as well as poultry of all species.

Sales of livestock and poultry for slaughter (in live weight) are sales of all types of livestock and poultry for slaughter through various distribution channels – to meat processing organisations and cool storage facilities; subsidiary production units of organisations; consumers' cooperatives; distributed or sold through catering facilities; sold on the markets or through other distribution channels.

Production of milk is actually yielded milk, including milk consumed in the farms for their own needs. Milk suckled by calves in sucking maintenance is not included.

Average milk yield per cow is calculated as a ratio of milk yielded from dairy herd cows to the average dairy herd population regardless of whether the cows milked or not in the reference period.

Production of eggs is eggs gathered from all kinds of farm poultry, including eggs used for poultry reproduction (incubation), production of egg powder, etc. as well as loss of eggs (breakage, spoilage, etc.)

### 7.1. Livestock population in farms of all types

(beginning of year; thousand heads)

Year	Cattle		Pigs	Sheep	Goats	Horses

## 8. FINANCIAL STANDING AND PRICES

Financial indicators are provided for agricultural organisations (organisations with principal economic activity in crop growing and/or animal husbandry) including small-sized business entities. Tables 8.1 and 8.2 include also data on private (peasant) farms.

Revenues from sales of products, goods, works and services are funds or other assets in monetary form received or receivable from sales of products, goods, works and services, in case of their recognition as a revenue in accordance with the legislation, for the main revenue-generating activity.

Net cost of products, goods, works and services sold means costs incurred to produce products, perform work and provide services related to the products, goods, works and services sold; sales costs, administrative expenses, and acquisition cost of goods sold.

Profit, loss (-) from sales of products, goods, works and services is the financial result from sales of products, goods, works and services defined as the difference between the sales revenues and net cost of products, goods, works and services sold and taxes and charges payable from revenues.

Profit, loss (-) before tax is the total financial result from operating, investment and financial activities.

Net profit, loss (-) is the final financial result of the company's activity for the reference period defined as a sum of profit (loss) from operating, investment and financial activities reduced by the sum of taxes and charges as well as sums payable from profit taking into account changes in deferred tax assets and liabilities.

Profitability of products, goods, works, and services sold is calculated as a ratio of profit from sales of products, goods, works and services to the net cost of products, goods, works and services sold. A negative financial result from sales of products, goods, works and services means operating at a loss.

Profitability of sales is calculated as a ratio of profit from sales of products, goods, works and services to the revenue from sales of products, goods, works and service. A negative financial result from sales of products, goods, works and services means operating at a loss.

A loss-making organisation is an organisation having net loss over the reference period.

Accounts payable are liabilities to suppliers and contractors for tangible assets received, works done and services provided; on advance payments received; with affiliated organisations, with personnel on wage payments, with budget and extrabudgetary funds, and other creditors.

Accounts receivable are liabilities of customers for goods, works and services; on bills of exchange received; of affiliated organisations, budget, personnel, and other debtors (including liabilities of accountable persons, advance payments granted to suppliers and contractors, and liabilities of other debtors).

Overdue indebtedness is debts that have not been repaid when due as specified by contracts and (or) legislative acts.

Agricultural producer price index reflects changes in prices of agricultural products produced by domestic companies and sold in the domestic market, excluding value added tax and transportation, loading and uploading costs, but including bonuses and discounts for quality.

The state statistical observation of prices of agricultural producers is based on the sample of reference organisations in agriculture. The sample of reference includes major agricultural producers which have a significant share in the sales of agricultural products and a definite specialty.

The aggregated agricultural producer price index is calculated by economic activity as well as separately by product type (subtype). The aggregated agricultural producer price index is computed by regions and at the level of the country.

Price parity index of industrial and agricultural products (price parity index of industrial products, works (services) used by agricultural commodity producers and sold agricultural products) reflects the proportion between changes in prices of industrial products and services consumed in agricultural production, and prices of sold agricultural products. It is used to analyse trade conditions and to correct pricing policies in agriculture.

## 8.1. Main financial indicators of organisations in agriculture

## 8.8. Price parity index of industrial and agricultural products

(as percentage of previous year)

	2014	2015	2016	2017	2018	2019	2020
Price parity index of industrial and agricultural products	94.1	108.8	101.7	93.8	101.9	100.9	97.1

## 9. PROCESSING OF AGRICULTURAL PRODUCTS

The volume of industrial production by economic activity "Manufacture of food, beverages and tobacco products" is a sum of finished and semi-finished products, works performed, services provided by the personnel of the organisation, intended for sales (made to order) to other organisations, population, non-industrial units of the organisation.

The volume of production of food, beverages and tobacco products is given without the cost of intrafactory turnover, in actual sales prices effective in the corresponding year, less taxes and fees calculated from the revenues and transportation costs for the delivery of products from the departure to the destination station, including the funds received from the budget in connection with the state regulation of prices and tariffs, to cover losses, to recover the cost of production and the cost of raw materials processed under contracts (unpaid).

Intrafactory turnover is the value of that part of finished and semi-finished products manufactured by the organisation, which are used for own industrial needs within the organisation and the value of which is included in the net cost of final industrial products.

Raw materials processed under contracts are raw materials owned by a customer and passed for industrial processing to other organisations to manufacture products under contracts concluded.

The volume of industrial production by economic activity "Manufacture of food, beverages and tobacco products" is given for large, medium, small and micro-organisations of all forms of ownership, regardless of their main economic activity, taking into account the volume of industrial production of individual entrepreneurs and households.

The number of organisations is provided by legal entities, active as of the end of the corresponding year, including small organisations, micro-organisations and newly registered businesses of all types of ownership with principal economic activity "Manufacture of food, beverages and tobacco products".

Production index for economic activity "Manufacture of food, beverages and tobacco products" is a relative measure reflecting changes in the output in periods under comparison.

The index of industrial production is calculated based on the dynamics of production of representative goods/ services and builds on individual production indices of specific products, with further step-by-step aggregation of individual indices in indices of production by economic activity and for the industry as a whole. At the first stage of index computation, the volumes of production of representative goods/ services for the base year are used as weights for aggregation. At following stages, the structure of gross value added by economic activity for the base year is used as weights for aggregation. The base year is equal t-2, where t is a reference year. The base year is changed annually. The time series was constructed using the chain index.

Industrial production in physical terms is generally measured by gross output, i.e. including products consumed for own industrial needs within the enterprise. The volume of production includes products manufactured both from own raw materials and from those supplied by customers.

Data on production in volume terms are given in accordance with the classification groupings of the National Classification of Economic Activities of the Republic of Belarus (OKRB 007-2012).

Percentage of production capacity use is a relative indicator characterizing the degree of production capacity use for the manufacture of certain types of products. It is calculated as the ratio of actual output to the average annual capacity effective in the reporting period for the manufacture of this product.

**9.1. Main indicators of organisations with economic activity

## 11. FOOD BALANCE SHEETS

The section presents food balance sheets of selected agricultural products and per capita consumption of basic foodstuffs.

Food balance sheets is a system of statistical indicators which reflect the sources of basic agricultural products, raw supplies and food, and their utilisation. The balance sheets show the flows of products from their production to their final use and allow for the routine analysis of the correlation between the resources and their use as well as for the forecasting of trends on the food market.

The level of self-sufficiency in basic agricultural products reflects the extent to which domestic production is able to meet all the demands of the country and is measured as the percentage ratio of domestic production to domestic consumption. Domestic consumption includes personal consumption of population, industrial use and processing for non-food purposes, and losses.

Data on per capita consumption of basic foodstuffs for 2014 - 2019 are recalculated using the average annual population adjusted for the 2019 census results.

### 11.1. Level of self-sufficiency in basic agricultural products (percent)

	2014	2015	2016	2017	2018	2019	2020
Meat	126.1	132.4	132.1	134.7	135.2	132.8	134.9
Milk	212.6	229.8	233.1	231.0	235.2	240.8	256.0
Eggs	130.7	129.4	132.0	129.2	123.7	128.4	125.9
Fish	12.1	13.1	15.3	13.9	15.0	13.8	12.0
Potatoes	108.7	105.1	104.1	112.3	106.4	111.0	100.4
Vegetables and cucurbits	97.8	94.8	106.7	105.5	99.8	107.3	101.9
Fruits and berries	63.5	55.2	57.5	43.5	80.5	48.0	66.8

## 11.2. Supply and use of meat and meat products

(thousand tonnes)

	2014	2015	2016	2017	2018	2019	2020
Supply							
Opening stock	68.9	54.7	54.4	38.8	45.1	41.5	54.1
Production <sup>1)</sup>	1 073.0	1 149.3	1 172.4	1 208.3	1 226.4	1 240.0	1 285.1
Imports	81.4	34.3	57.1	51.3	59.2	66.2	64.7
Total supply	1 223.3	1 238.3	1 283.9	1 298.4	1 330.7	1 347.7	1 403.9
Use							
Domestic consumption	850.8	868.2	887.6	896.7	907.2	933.8	952.9
individual consumption	829.6	852.4	872.9	883.3	895.7	918.1	932.4
Exports	317.8	315.7	357.5	356.6	382.0	359.8	399.7
Closing stock	54.7	54.4	38.8	45.1	41.5	54.1	51.3

<sup>1)</sup> Livestock and poultry in slaughter weight.

## 11.3. Supply and use of milk and dairy products

(thousand tonnes)

	2014	2015	2016	2017	2018	2019	2020
Supply							
Opening stock	136.7	317.4	226.4	226.6	333.2	230.0	233.2
Production	6 702.9	7 046.8	7 140.0	7 320.8	7 344.6	7 393.5	7 765.3
Imports	237.2	142.7	171.5	66.1	61.4	77.4	88.5
Total supply	7 076.8	7 506.9	7 537.9	7 613.5	7 739.2	7 700.9	8 087.0
Use							
Domestic consumption	3 152.3	3 066.8	3 063.4	3 169.2	3 123.3	3 070.3	3 032.8
individual consumption	2 377.8	2 373.5	2 342.6	2 407.7	2 337.7	2 313.5	2 284.5
Exports	3 607.1	4 213.7	4 247.9	4 111.1	4 385.9	4 397.4	4 817.7
Closing stock	317.4	226.4	226.6	333.2	230.0	233.2	236.5

### 11.4. Supply and use of eggs and egg products

(million pieces)

	2014	2015	2016	2017	2018	2019	2020
Supply							
Opening stock	59.5	56.7	48.2	47.9	53.8	55.1	62.5
Production	3 858.1	3 745.9	3 615.0	3 515.9	3 362.8	3 514.3	3 494.6
Imports	16.3	15.2	21.4	40.8	43.1	45.3	16.1
Total supply	3 933.9	3 817.8	3 684.6	3 604.6	3 459.7	3 614.7	3 573.2
Use							
Domestic consumption	2 952.6	2 894.2	2 738.7	2 720.8	2 719.6	2 737.6	2 776.6
individual consumption	2 724.8	2 660.1	2 504.8	2 471.4	2 453.6	2 484.2	2 515.3
Exports	924.6	875.4	898.0	830.0	685.0	814.6	727.6
Closing stock	56.7	48.2	47.9	53.8	55.1	62.5	69.0

### 11.5. Supply and use of fish and fish products

(thousand tonnes)

	2014	2015	2016	2017	2018	2019	2020
Supply							
Opening stock	24.3	21.9	21.4	21.7	22.2	22.9	21.9
Production	19.8	18.2	19.0	18.1	19.6	17.6	15.2
Imports	181.0	167.7	159.0	177.9	175.7	177.5	179.9
Unrecorded supply	24.6	18.3	14.0	16.2	18.8	21.9	24.4
Total supply	249.7	226.1	213.4	233.9	236.3	239.9	241.4
Use							
Domestic consumption	163.3	138.5	124.1	130.0	130.6	128.0	126.6
individual consumption	148.1	125.3	116.4	119.7	121.2	118.3	117.1
Exports	64.5	66.2	67.6	81.7	82.8	90.0	92.1
Closing stock	21.9	21.4	21.7	22.2	22.9	21.9	22.7

## 11.6. Supply and use of potatoes and potato products

(thousand tonnes)

	2014	2015	2016	2017	2018	2019	2020
Supply							
Opening stock	3 904.1	4 215.2	4 187.7	4 004.4	4 285.7	4 271.5	4 475.0
