BELARUS

towards the Sustainable Development Goals

In September 2015, the Republic of Belarus became one of the 193 countries which expressed their commitment to the 2030 Agenda for Sustainable Development. The 2030 Agenda and to ensure sustainable, comprehensive and progressive economic growth, social integration and environmental protection, as well as facilitate peace and security on the planet. **The 2030 Agenda includes 17 Sustainable Development Goals (SDGs) to be reached by 2030.**

For efficient implementation of the goals and targets specified in the 2030 Agenda, the position of **the National Coordinator on Implementation of Sustainable Development Goals and the architecture for SDG achievement monitoring**, including the Council on Sustainable Development, parliamentary, partner and regional sustainable development groups, the group on mass media coordination for promotion of SDGs, the Public Council on Generation and Monitoring of Sustainable Development Strategies, as well as SDG youth ambassadors, were established in the Republic of Belarus.

The National Statistical Committee of the Republic of Belarus (Belstat), as a part of the Council on Sustainable Development ensures coordinated monitoring and evaluation of implementation of the 2030 Agenda. This is fully in line with the international approaches where the role for SDG monitoring belongs to the United Nations Statistics Division.

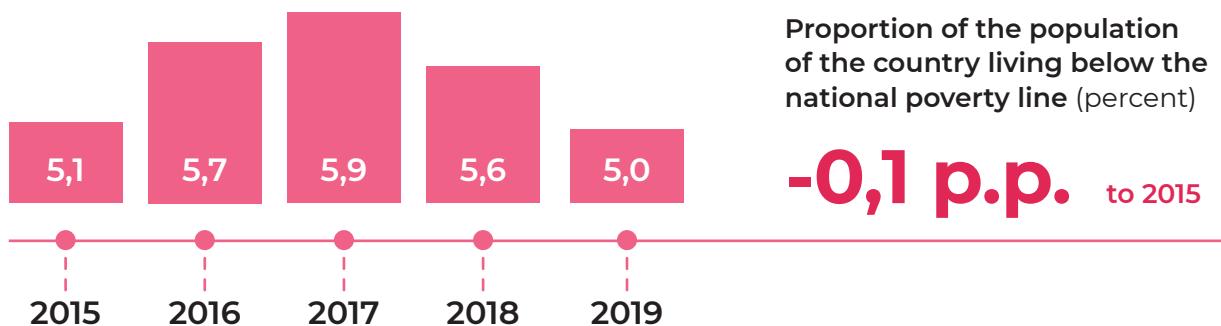

The progress towards SDGs is tracked according to **the National List of SDG Indicators** developed by Belstat in close cooperation with the governmental agencies responsible for SDG implementation.

The major tool for monitoring and dissemination of data on SDG indicators is **the National SDG Reporting Platform** (www.sdgplatform.belstat.gov.by). The National Platform is the centre for collection and summarization of information about the current SDG situation in the country, as well as a reliable source of relevant information for planning and tracking the sustainable development of the country, monitoring of implementation of international commitments, and preparation of national reports on SDG achievement in the Republic of Belarus.

This publication presents indicators reflecting sustainable development of the Republic of Belarus.

Belarus has eradicated extreme poverty, whereas the size of low-income population is half the average of the CIS and East European countries.

SUSTAINABLE DEVELOPMENT GOALS IN BELARUS

The booklet was prepared by the National Statistical Committee of the Republic of Belarus.

The booklet was designed and printed within the Project "Support for the functioning of the National Institutional Mechanism for achievement of the Sustainable Development Goals of the Republic of Belarus".
The National Implementing Agency of the Project is the Ministry of Foreign Affairs of the Republic of Belarus under the coordination of the National Coordinator on Implementation of Sustainable Development Goals.
